## TX eLINC TxDMV Review

**YML TRUCK LLC**  
USDOT 3088517

**Thank you for completing the TxDMV Self-Registration process.**

The yellow light above indicates TxDMV is conducting a review of your application. The results of the review will be emailed to you within 24 hours. If the information you provided does not meet our registration requirements, you will have 45 days to correct any deficiencies. If at the end of that period any deficiencies remain, your application will be declined.

If the application is approved, you will be provided instructions via email on how your insurer can file insurance, how you can add your vehicles, and pay fees. Once insurance is filed and your fees are paid, you will be issued an active certificate number and you will be licensed to operate in Texas. You can log out of eLINC at this time. If the traffic light changes to a green light when you log back in, then your application has been accepted. If the traffic light becomes red, then your application has been rejected. Either way, you will receive an email informing you of the status of your application.
