ML Cargo has taken steps to ensure accurate accountability of logged driving hours of all drivers by first developing a training program that instructs drivers on how to properly maintain log books and instructions on DOT regulations for on duty hours and driving hours. Second we have internal company protocols that issue fines to drivers that do not follow DOT regulation or company protocols. Finally we have incentive program that rewards drives upon completing DOT inspection that have no faults.

ML Cargo LLC has implemented new standard operating procedures for vehicle maintenance and in order to track and catalog areas of concern with all equipment drivers must inform the main dispatch office of any deficiency noted upon daily vehicle inspections. All preventive maintenance must include a DOT sanctioned inspection that include both tractor and trailer equipment .

Thank you
Luis Chand (Owner)
